

## **Dribbble Training Certification Course Outline**

### **Module 1: Introduction to Dribbble**

- First, understand what Dribbble is and how designers share their work.
- Next, explore the platform layout carefully.
- Then, see popular designer profiles for inspiration.
- Finally, plan how you will use Dribbble to grow your skills.

### **Module 2: Setting Up Your Account**

- First, sign up using your email or social accounts.
- Next, choose a professional username that represents you.
- Then, upload a clear profile picture.
- Finally, write a short bio highlighting your skills.

### **Module 3: Exploring Design Styles**

- First, browse projects to understand different design styles.
- Next, note colors, fonts, and layouts used.
- Then, find your preferred style to practice.
- Finally, keep a list of favorite designers for reference.

### **Module 4: Creating Your First Shot**

- First, open your design software and create a new project.
- Next, design a simple shot like a button or icon.
- Then, save it in the correct resolution for Dribbble.
- Finally, upload your first shot to your profile.

### **Module 5: Writing Descriptions & Tags**

- First, add a clear title for your shot.
- Next, write a short description explaining your work.
- Then, add relevant tags to help others find it.
- Finally, double-check spelling and clarity before posting.

### **Module 6: Adding Visuals & Mockups**

- First, include high-quality visuals for your shot.
- Next, add mockups to make your design realistic.
- Then, ensure colors and alignment look clean.
- Finally, preview your shot before publishing.

### **Module 7: Engaging With the Community**

- First, follow designers who inspire you.
- Next, like and comment on other shots politely.
- Then, join design challenges to practice regularly.
- Finally, respond politely to comments on your shots.

### **Module 8: Improving Your Portfolio**

- First, remove outdated or low-quality shots.
- Next, organize shots by category or project.
- Then, update your best work regularly.
- Finally, ensure your portfolio reflects your current skills.

### **Module 9: Using Dribbble for Networking**

- First, connect with other designers via messages.
- Next, join discussions in comments and forums.
- Then, attend virtual events or webinars for exposure.
- Finally, offer constructive feedback to build relationships.

### **Module 10: Promoting Your Work**

- First, share your Dribbble shots on social media.
- Next, add your portfolio link to your resume.
- Then, participate in design communities online.
- Finally, track which promotions get more views and likes.

### **Module 11: Finding Freelance Opportunities**

- First, explore freelance projects shared on Dribbble job boards.
- Next, apply to projects matching your skills confidently.
- Then, prepare a portfolio highlighting relevant work.
- Finally, communicate professionally with potential clients.

### **Module 12: Certification & Growth**

- First, review all 11 modules carefully.

- Next, complete a short test or project to show your knowledge.
- Then, receive your official Dribbble Training Certificate.
- Finally, plan your next steps to grow as a designer.
